## MERRITT'S REPORT

### He Held No Conference With Insurgent Chief.

### Conduct of Troops in Battle Is Praised.

By Telegraph to Evening News.

Washington, Sept. 30.—Gen. Merritt's official report on the surrender of Manila was made public today. He says that on his arrival he did not hold any communication with Aguinaldo, the insurgent leader, because the president's orders were that the Americans powers of military occupation of the islands, were to be absolute and supreme and immediately operative on the political conditions. For these reasons preparations for an attack on the city were made without any reference to the insurgents.

Gen. Merritt gives in detail a report of the battle of July 31 and speaks highly of the conduct of our troops. Of the battle of August 13 he has nothing new to tell.

### Man Accused of Robbing a Dead Citizen.

John Coverdale of Buchanan was discharged on the count of larceny in the circuit court today. He was defended by Attorney Riford and his case did not even come to trial. It appears that Coverdale was hired to sit up all night with the remains of Isaac Dumbarton, an aged Buchanan man who died suddenly. Next morning a watch was missing from the house and Coverdale was accused of the crime.

The case of the people vs. Kate Hoover of Niles for larceny is now occupying the time of the court.

## MODEL JURY.

### Those Now Serving on Panel Fill Description.

There are always several men of excellent judgment on every jury that sits in Berrien county but the present panel is being complimented because there is not a poor juror in the lot. All the men have taken great pains to see that justice was meted out in each case and the court officers and those about the court house believe the present panel is the best that ever assembled at the new court.

They not only have good judgment in regard to matters of law, evidence and justice but they know a good thing when they see it. That is why the jurors are wearing badges for the big carnival at Benton Harbor week after next.

## ANOTHER QUESTION

F. M. Van Horn Now Queries Editor Gilson.

F. M. Van Horn, the gentleman who recently wrote a letter to Governor Pingree and is dying of a disconsolate heart because the great war governor didn't answer him has strength enough left to tackle an easier proposition. He asks the following in a public way:

EDITOR EVENING NEWS: In 1896 all the republican speakers from McKinley to Gilson told the people that if the republican ticket was elected confidence would be restored and the money in the vaults and the old stockings would seek investment. We elected the ticket and instead of capital seeking investment it is seeking bank vaults and old stockings faster than ever. That's why the Farmers & Merchants bank has \$300,000 idle money on hand. Will Editor Gilson please explain why this money doesn't seek investment as per promise. F. M. VAN HORN.

## THINGS TO REMEMBER

The great charm of all power is modesty.

Spend less energy every day than you make.

Never appear anxious, however great your anxiety.

Three things to respect: Old age, law and religion.

Three things to love: Honesty, purity and the truth.

Three things to value: Time, money and good health.

Three things to govern: The tongue, temper and actions.

It is the small temptations which undermine integrity.

Three things to despise: Cruelty, meanness and ingratitude.

Two of the best and bravest emotions of a man—love and loyalty.

Three things to cultivate: Sympathy, cheerfulness and contentment.

Do your best all round; keep good company, read good books, love good things, and cultivate soul and body as faithfully and wisely as you can.

## NOT GUILTY

The Jury Set Jacob Schwenk of New Buffalo at Liberty.

Touching Scene When Verdict Was Rendered Last Night...

After being out six hours the jury in the murder trial of Jacob M. Schwenk of New Buffalo brought in a verdict of not guilty at 9 o'clock last night.

The verdict met the hearty approval of those who had waited during the weary hours of the afternoon and evening for the appearance of the jury. When the foreman announced that a verdict of not guilty had been reached there was applause from those who were present to hear it. Judge Coolidge said it was not often he allowed any demonstration but he was so tired out last night that he cared little what went on.

When the jury filed in and the foreman announced the verdict the scene was most affecting. The big prisoner who by the verdict at once became a free man was visibly moved. Up to this time he had kept his composure. Now his wife, who too had borne the trial with great fortitude, broke down and wept. She threw her arms about her husband and kissed him and over and over again amid sobs of joy she thanked God and the jury that her husband was at last free. Great drops of sweat came out on Jake Schwenk's face as he caressed his wife and thanked the jury. "I kept a stiff upper lip," he said, "all through the trial, but I never could have done it but for my wife and my child."

The jury was out six hours and so many ballots were taken that no account of the number was kept. The first vote stood eight for acquittal and four for conviction. Several more ballots were taken and the next change in the vote was nine for acquittal and three for conviction. After balloting awhile longer a change was made to ten and two, and there was no further change until there were twelve votes for acquittal. W. F. Howard was elected foreman of the jury.

No juror held the idea that Schwenk intended to kill or seriously injure De Vinne, and several of the jurors, at least, held the opinion that Rau did the cutting as testified and that De Vinne had no knife.

While the general impression about the court house was that Schwenk was not entirely free from blame in the matter it was the belief that he had sufficiently suffered for his act already.

Prosecuting Attorney Valentine is coming in for much praise in his conduct of the case. He did not endeavor to convict Schwenk right or wrong but he laid all the facts before the jury in a clear and systematic manner and appealed to their judgment, not their prejudices.

### THE CHARGE.

Judge Coolidge's Instructions to the Jury.

The charge of Judge Coolidge to the jury completely covered the law in the case. In it he said:

At the outset we are confronted with these facts: That the defendant inflicted a blow on De Vinne and that De Vinne then fell on a pile of brick, that his skull was fractured and that he shortly thereafter died. Now, if the blow was an unlawful act, and the death of De Vinne resulted as a consequence therefrom then the defendant is guilty of manslaughter. It is immaterial whether the blow was of sufficient force to cause death or not in itself if it produced the fall and that fall caused death and the blow was unlawful. But if the blow was lawful or excusable or done lawfully in self-defense the defendant is not guilty. If the defendant was guilty of assault and battery causing the death of De Vinne he is guilty of manslaughter. When a party is guilty of assault and battery which results in death the party is guilty of manslaughter.

It must not be inferred, however, from the fact that De Vinne died that excessive or brutal force was actually used, because the immediate cause of the death was falling on the brick. You must judge from the evidence in itself, whether the defendant used excessive force which he knew to be excessive force.

The defendant has introduced testimony for the purpose of showing his good character for peaceableness. Good character is always an important and positive defense. It may itself raise a doubt of the defendant's guilt. The importance of this defense arises from the fact that the commission of a crime is rendered improbable by a uniform course of life, inconsistent with such crime.

You should endeavor to ascertain the real cause and starting point of the difficulty, who was the original aggressor, De Vinne or the defendant? Upon the answer to this question depends the inquiry. Was the assault of defendant lawful or unlawful? If De Vinne was ordered out of the saloon and refused to go and resisted an attempt to remove him from the saloon, De Vinne was the aggressor. If on the contrary, the defendant became enraged at De Vinne simply because De Vinne made some remark at defendant's conduct toward Nelson and at once assaulted De Vinne, such assault was unlawful and if he continued such assault and during such assault the defendant administered a blow which resulted in De Vinne's death it is a case of manslaughter.

If a man unlawfully strikes another

man and by accident kills another man, he is guilty of manslaughter.

If a person carelessly throws a stone at a horse and kills a man, he is guilty of manslaughter.

If two men engage voluntarily in a fight or affray, both equally at fault, and one of them kills the other, he is guilty of manslaughter.

#### Chief Hepler Explains.

In Tuesday's issue the Twin City Daily Times stated in an article under the caption, "Refused to Prosecute," that Mr. Valentine refused to prosecute Mr. Watson, who forged three checks on S. A. Bailey. THE EVENING NEWS of Wednesday says that no one wished to push the case. As chief of police of Benton Harbor, drawing a salary from the taxpayers to keep out of the city such men and to capture them if possible, I ask THE NEWS or Mr. Valentine what he draws a salary of \$1,500 per year for? Is it to prosecute criminals, such as the man Watson confessed to be? When THE NEWS says that no one wanted to push the case, it knows not whereof it speaks, for I, as chief of police of this city, after capturing Watson kept him for three days at the expense of the city, until Prosecuting Attorney Valentine refused to go ahead with the case. I have no desire to be unfair with Mr. Valentine or any one connected with the case, but I know that there was a great deal of unfavorable comment upon the case at the time it occurred and I should not have said anything in reply to the article had I not been charged with asking that the case be not pushed.

Chief of Police.

### IS TYPHOID MALARIA.

That is Keeping Roy Kramer at Montauk Point.

A letter from Mrs. Kramer written Wednesday says:

"It is now two o'clock and Roy's fever is up to 102. I hope it will go no higher today. One day it is up and the next day it is low again. A boy in Roy's ward was up and dressed yesterday and today he is out of his head. The doctor says Roy's fever is typhoid malarial and that he never recovered entirely from it when in Cuba. I wonder that he ever lived to get here but he tells me he had such good care. When he gets so he can sit up we can tell something about when we can come home."

### TAKEN WITH SALT.

John A. Mays Does Not Believe all He Hears.

EDITOR EVENING NEWS: At the meeting held at Conkey's opera house Tuesday night statements were made that seem to me to be entirely wrong. One speaker declared that the recent bond issue contracted the volume of currency, so much so that the money now in circulation was only \$5 or \$6 per capita. The same money that was taken by the government for the bonds is certainly not only in existence today, but is in circulation today. That large amount of money amounting to fourteen millions that went up to Washington seeking an investment and six-sevenths of which found none, was returned to those to whom it belonged, is pre-eminently lying idle and the \$200,000,000 which was taken for the bonds is in circulation. I myself have received a part of it in the form of a pension at the rate of \$6 per month and thousands and tens of thousands of others are daily receiving it. The government is circulating it at about the rate of one million a day. Who has the power to increase the volume of currency? Some say congress. Who ever heard of congress saying what the per capita should be. Business increases the volume of currency. When the product of the farm or factory is sold in foreign countries and the money brought to this country the volume is thereby increased. When Mr. Phisicator returned to the states with his \$120,000, as was reported, the volume was increased just that amount. Did congress have anything to do in sending Mr. Phisicator to Alaska? It seems to me that this money for the bonds is being circulated with a vengeance and I am not able to say how to get this money, that is lying idle in the banks, into circulation unless it be by another bond issue.

Yours truly,  
JOHN A. MAYS.

one month, .40c; in advance.  
The Weekly News, \$1.00 a year

TWIN CITY TELEPHONE 172.

FRIDAY, SEPT. 30, 1898.

## THREE YEARS OLD.

The first issue of THE EVENING NEWS was printed on September 30, 1895—just three years ago today.

It was then predicted—as is always predicted of new enterprises of this kind—that the paper would not exist six months, but happily, for the management at least, the prediction was not realized and the business is now one of the solid enterprises of the city and is so considered on all sides.

The success of THE EVENING NEWS was not attained because it was started to fill "a long felt want." There is never an open field for any newspaper enterprise. In cities where daily newspapers are already established there is no crying demand for another paper. In cities where no daily is published the people read the large city dailies and are satisfied until a demand is created for something else.

The publisher of THE EVENING NEWS believed that in Benton Harbor a demand could be made for a daily paper that chief of all would aim to print the news; a paper not controlled by any party or faction, that in the publication of news would know no friends and know no enemies. That is the kind of a newspaper THE NEWS has tried to be. The business success it has enjoyed is proof that its efforts have the approval of the people.

In the coming year THE NEWS will be improved in style and contents as rapidly as the growing business of the paper will admit. There is today no newspaper published in a Michigan town the size of Benton Harbor that pays as much for telegraph service as THE EVENING NEWS. This is but a single item but the policy of the paper in all lines is not how cheap can the paper be made and yet sell, but how good can it be made.

And on its third birthday THE NEWS thanks the business men and the people of Benton Harbor and Berrien county for their loyal support and cordial encouragement during the past three years. We shall endeavor to merit a continuance of their confidence and patronage.

If the esteemed Palladium would take a few minutes off and look over the files of its valuable periodical it would find wherein there was unfairness and untruthfulness in the late lamented municipal campaign. If it has not time to do that then let it inquire of the republican leaders of the city.

IF THE EVENING NEWS ever has another prize dinner contest it will bar Fred Rowe from competing for the prize. This will be simple justice to the world in general.

New York democrats had better take to the woods now. It will be too late to get away after the rough rider begins his campaign.

AFTER all Brothers Whiting and Van Horn are not far apart. There is only 950 nobbys between them.

LET'S drop politics for the next week and pick up the street fair and push it.

## INSECT HEAVY DRINKERS.

Batteries in For Hours Seeking More Moisture Than Needed.

By means of a large number of observations Mr. J. W. Tutt is able to confirm what has been stated by other observers that certain butterflies and moths are very much addicted to drink. In a paper published in the "proceedings" of the South London Entomological and Natural History society Mr. Tutt says there can be no doubt that butterflies drink more than is required by their tissues under any possible conditions. He has known Polyommatus damon to sit for more than an hour motionless except for the slight movement of sucking up and discharging the moisture almost continuously.

What this internal bath may really mean cannot be surmised. Another important factor as to this drinking habit is a strange one, the "thirsty souls," as far as his observation goes, being almost entirely males. Possibly if exact observations could be made it might be found that females in small numbers also visit puddles, pools and streams for drinking purposes, but as far as Mr. Tutt has been able to discover it is the males alone who indulge in these copious libations, while the females are away laying eggs. Moths and butterflies of both sexes visit sugar, overripe fruit and similar dainties, but they do so for food. The males alone seem to be attracted by pure water, and Mr. Tutt suggests that, their extra activity having originally given them greater need in this direction, a habit which was at first a necessity has become so pleasurable that excessive drinking has literally become a vice.

## MUSIC FROM HEAVEN.

Charming German Method of Summoning Church Worshippers.

While religious music will doubtless live as long as religion itself there is one branch of it—if music it can be called—which is luckily becoming obsolete. I refer to bells and chimes. I shall never forget the look of distress with which a famous organist once said to me that whenever he heard a set of chimes he wished he could put his ears in his pocket.

In these days of \$1 nickel watches bells are no longer needed to inform people when the service begins. They are, moreover, a decided nuisance, and often a dangerous one, for they have killed many invalids whose life depended upon a few hours' sleep, which the bells murdered. In New York bell ringing has been frequently stopped on account of complaints to the board of health.

If it seems desirable to have a means of summoning worshippers to church, why not adopt the delightful old custom that is still observed in some south German villages and in the city of Stuttgart? There four trombone players ascend a church tower three times a day and play a solemn chorale.

In all my musical experience I have never heard anything more thrilling than those majestic harmonies in the air, which seemed to come straight from heaven. If our churches would adopt this custom and these celestial sounds became associated with religious experiences, they might arouse the dormant devotion of many a one who otherwise would pass the church door by.—Forum.

## Beware of Ointments for Catarrh that contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c. per bottle.

## THE FIRST PHOTOGRAPHS.

Professor Draper's Sister the Thirty Minutes For Her Portrait.

Elizabeth Flint Wade has an illustrated paper on "Photography—Its Marvels" in St. Nicholas. The author says: The first accounts of this great discovery are very entertaining reading. Professor Morse, the inventor of the telegraph, was in Paris when the news was published, and at once went to see Daguerro's wonderful pictures. In describing them afterward he said that moving objects made no impression on the plate, for a picture taken of a crowded boulevard showed it as if entirely deserted, with the exception of a man having his shoes polished. The man's feet, he said, were well defined, because they were kept stationary, but he was without head or body, for these were in motion.

To America belongs the honor of making the first photographic portrait, the artist being Professor John Draper, a professor and afterward the president of the University of New York. His victim was his sister, Miss Catherine Draper. He powdered her face, that the likeness might be more quickly impressed on the sensitive plate, and for 30 minutes Miss Draper sat—or, at least, tried to sit—as immovable as a statue.

The first class in photography was formed in Boston in the spring of 1840 by Daguerro's agent, Gouard of Paris. The Rev. Edward Everett Hale, then a student in Harvard, became an enthusiastic member of the class. In his diary, under date of April 1, 1840, is this entry: "On my way home I stopped at the shop and got my daguerreotype thermometer. There seems to be a great demand; there were three or four others there."

RELATIVES.

The export of bicycles is on the in-  
crease.  
Pig iron production is now 225,000  
tons per week.

Researches into the constitution of  
matter are being made.

Manufacturing establishments are  
forcing production day and night.

The Siberian railroad is going ahead  
at the rate of three miles a day.

Five steel tugs are to be built at  
Dybbuque. Electrical houses are crowd-  
ed.

More people are now earning fair  
pay in the United States than for many  
years.

France has 16 new battleships, 10 old  
battleships of doubtful value and 25  
modern cruisers.

In some parts of Europe they put an  
electric motor on a tricycle and haul  
canal boats easily.

A fast steamer made the 4,200 miles  
between Yokohama and Tacoma in 12  
days and 17 hours.

There are 1,100 students in the New  
Armour Institute, Chicago, and there  
will be 2,000 in a year.

An immense ship building yard is to  
be erected in Scotland. This country  
is to have two or three.

There is another seamless tube out  
that beats everything. They are drawn  
at the rate of 24 feet per minute.

For the first five months of this year  
fire losses in the United States and Can-  
ada foot up \$49,000,000 against \$52,000,-  
000 same time last year.

Brass is a very common article in  
manufacturing. It is now to be partly  
displaced by aluminum coated with  
copper or brass.

"Kaiser Friedrich" is a new German  
ship just arrived at New York, 600 feet  
long, steel, 25,000 horse power, steam  
pressure 225 pounds per square inch.

Three million dollars is being spent  
by the United States Government on  
the harbors of Lake Superior. The Du-  
luth Superior harbor is to be made 21  
feet deep.

If Great Britain had to go to war it  
could send out 34 new battleships, 52  
large cruisers, 97 very rapid torpedo  
boat destroyers, besides a large num-  
ber of other vessels, including 20 older  
battleships as a reserve that can do  
deadly work.

Gathman's aerial torpedo spoken of  
is the most dangerous torpedo in ex-  
istence, they hold 400 pounds of gun-  
cotton, while those now in use hold  
only 50. These shells are just as de-  
structive at eight miles as at 800 feet.  
They are made of brass.

Some Yankee concern will soon have  
a contract to make 246 miles of riveted  
steel pipe, 31 inches internal diam-  
eter and 82 miles welded steel pipe of  
26 to 29 inches diameter for western  
Australia. Water is to be brought up  
hill and down dale all this distance.  
The cost is \$12,000,000.

Chimney stacks will soon be made  
300 feet high. There is one in Brook-  
lyn 240 feet high, made of steel; diam-  
eter at bottom 25 feet; 25 feet up it  
tapers to 15 feet, 6 inches; at the top  
it is 12 feet. The steel plates are 3/4  
of an inch thick. It is lined through-  
out by fire brick, backed by red brick.

China buys nearly one-half of the  
entire exports of American cotton  
cloths, and our drills are used in mak-  
ing sails for the thousands of boats  
engaged in navigating the rivers of  
that country. Russian cotton goods,  
which have successfully competed with  
those of England in the markets of  
Persia and Central Asia, have hardly  
yet made their appearance in the Chi-  
nese markets.

The earth weighs 6,000,000,000,000,-  
000,000,000 tons. It would take a 10,-  
000 horse power engine 70,000,000,000  
years to lift it one foot. The water  
necessary to make the steam to do this  
is equal to the amount that would flow  
out of the Mississippi in 60,000 years.  
This would be enough water to cover  
the entire surface of the earth to a  
depth of about 300 feet; to convert this  
water into steam, using good boilers,  
would require about 4,000,000,000,000,-  
000 tons of coal; if this coal were load-  
ed on cars 20 tons each it would re-  
quire 200,000,000,000,000 cars; if the  
cars were three feet long and all cou-  
pled together in one train it would  
reach round the earth 45,000,000 times,  
and if it was running 25 miles per  
hour it would require 5,000,000 years for  
it to run the length of itself.

SEEK METHODS THAT MAKE WELL. Allo-  
pathic, homoeopathic, hydropathic, hygienic,  
psychopathic, electric, physio-medical, dietetic,  
bio-chemical, official and other systems in-  
vestigated and the best principles of each ap-  
plied for conditions in which they have proven  
the most beneficial. No one school of medicine  
has all the good things, there is some one rem-  
edy that is best of all in each. The real physi-  
cian must represent not one school system or  
pathy, but the healing art in all its entirety,  
study and compare all curative measures, then  
select and apply the pleasant, safest and  
surest. It is better to cure by any system that  
will accomplish such result than be obstinately  
or dogmatically in methods. The motto of a true  
healer is "No code or creed, but cure."

TO THE PUBLIC it is but just to you and  
honest that I make some mention of my fitness  
for the work I would undertake. I came of a  
medical family. I have attended and had  
credentials from leading colleges of various  
schools or systems of medicine. For years I  
have successfully conducted a large practice.  
I have held high office in state and national  
medical societies, and received honorary pro-  
fessional recognition abroad. I have had con-  
siderable hospital experience, was an intimate  
associate of distinguished experts and familiar  
with their methods; and something of a medical  
author and have been professor in one of the  
medical colleges. These statements are easily  
verified. If they commend me to your  
confidence it will give me pleasure to profes-  
sionally advise and assist, healthward all who  
need and desire my services. Office practice  
preferred, but if properly arranged for visits  
will be made any distance. Respectfully,

## PERSONAL AND OTHERWISE

Never try to tell what you don't know. Life is too short.

Every man should shun liquor drinking as he would taking arsenic.

The sad consequence of defection in principle is corruption in practice.—Dickens.

Bad temper is its own scourge. Few things are bitterer than to feel bitter. A man's venom poisons himself more than his victim.

The following is a literal transcript of a sign on a Pennsylvania village store: "Tea and Taters, Sugar and Shingles, Brick-dust and Lasses, whiskey, Tar and other Drugs."

The keel of the ship lies concealed, yet it is indispensable to her progress and safety; so virtue does not always appear upon the surface, yet true manhood is unknown without it.

One of the stations of the railway which is to be built from the Red Sea to the top of Mount Sinai will be on the spot where it is supposed Moses stood when he received the two tables of the law.

The age of whales is ascertained by size and number of laminae of the whalebone, which increases yearly. Ages of three hundred and four hundred years have been assigned to whales from these indications.

In consequence of a telephone wire falling upon the overhead wires of the street tramways at Zurich, Switzerland, the central station of the telephonic service, which has five thousand subscribers, caught fire and was completely destroyed.

The hard tack of to-day is a good deal better than the hard tack of the sixties which the soldiers broke their teeth on. The crackers are smaller, softer, and more digestible, and they cannot be used as plates.

Among the Siamese the curious custom obtains of reversing the elbow-joint of the left arm as a sign of superiority. The children of both sexes are trained to reverse their elbow in this painful position at an early age, if their parents are persons of high grades.

The curfew law obtains in Seoul, Korea, but it is made applicable to men only. When the huge bronze bell of the city proclaims the hour of sunset and the time for closing the gates every man is obliged to retire to his home, under pain of flogging; but the women are allowed to go about at all hours.

The abandonment of the post office at Kaskaskia, Ill., for want of patronage calls to mind the fact that this is the oldest town in the State, having been founded by La Salle in 1682—the same year in which Penn founded Philadelphia. It has remained distinctively French to this day, and the modern movement seems to have avoided it.

The cost of constructing the Suez Canal amounted to nearly \$100,000,000, about one-third of this sum being contributed by the Khedive. Twenty-five thousand men were employed on the work. Food and water were transported by a regiment of 1,600 camels at a cost of over \$1,500 per day. Operations were commenced on April 25, 1853, and the great undertaking was brought to a successful finish in 1869.

"Soldiers from Illinois, New York, and Ohio lead the army as letter writers," said an official of the Post Office Department, "and they come about in the order named so far as number of communications is concerned. Judging from the stack of letters at headquarters of these three States, all the people at home are writing to their loved ones in camp at least once a day."

Major General Shafter holds a medal of honor awarded him under the provisions of the act of March 3, 1896. The medal was granted for most distinguished gallantry in the battle of Fair Oaks, Va., May 31, 1862, while serving as first lieutenant of Company I, Seventh Michigan Infantry, in command of pioneers; voluntarily taking an active part in that battle and remaining on the field, although wounded, until the close of the engagement.

## THE LADRONES

Few men work.

Discovered in 1521.

Pure water abounds.

A chain of volcanic islands.

Spain took possession in 1668.

Mountains range from 1,000 to 3,000 feet.

Eight thousand five hundred inhabitants.

Chief products coconut and bread fruit

The account given by Dampier of the remarkable bread fruit tree follows: "A certain fruit called the bread fruit, growing on a tree as big as our large apple trees, with dark leaves. The fruit is round and grows on the boughs like apples of the bigness of a good penny loaf. When ripe it turns yellow, soft and sweet, but the natives take it green and bake it in an oven till the rind is black. This they scrape off and eat the inside, which is soft and white like the inside of new baked bread, having neither seed nor stone, but if it is kept above twenty-four hours it is harsh."

## POINTED PARAGRAPHS

An awkward man is always getting on a woman's trail.

It's a pity that some men can't even hope to have brain fever.

More work would be done for posterity if it wasn't such slow pay.

A man looks once at a girl's face; a woman looks twice at her dress.

It is an indisputable fact that a tall man lives longer than a short one.

A great many financiers have their loose change tied up in old stockings.

The value of a golden opportunity depends upon the amount of gold there is in it.

It's harder for a musician to compose a squalling baby than a popular song.

There can be no harm in the assertion that some paintings are works of art and that a great many women paint.

## FOREIGN NOTES

Twenty thousand persons from all parts of county Wexford assembled on Vinegar Hill on May 29 in honor of...

Two small vessels equipped with Parsons turbine engines, with a guaranteed speed of thirty-five knots, have been ordered by the British Admiralty.

At a recent English inquest it came out that of five persons who had received legacies of \$500 each two years ago four had already drunk themselves to death.

Lieut.-Gov. von der Goltz, better known as Von der Goltz Pasha, the re-organizer of the Turkish army, has been appointed Inspector-General of Fortresses in the German army, in place of Gen. Vogel von Falkenstein. The office is second in importance only to Chief of the General Staff.

Sam Slick's son, Sir Arthur Haliburton, late Permanent Secretary of the War Department, was made a peer on the Queen's birthday, and is said by the Court Journal to have selected the title of Baron Haliburton. He is a native Nova Scotian and the first Blue Nose to enter the House of Lords.

From Madrid comes a strange story of a row in the cathedral chapter of Toledo, during which high words were exchanged between Cardinal Archbishop Sanchez and the dean of the chapter, resulting in a challenge. The duel has not yet taken place, as the seconds are unwilling to impose the bloodthirsty conditions demanded by both principals.

Balletmaster Franke, who died recently at Weimar, aged eighty-three, owed his start in life to his Excellency Secret Councillor von Goethe, who used his official influence to secure a place for him in the Weimar theatre, where he appeared as a solo dancer in 1828. He served in the court theatre fifty-five years, and was appointed balletmaster in 1853.

Victor Hugo's art of being a grandfather seems to have resulted in two spoiled grandchildren. Georges Hugo was at the Odéon Theatre one evening recently in company with Leon Daudet, from whom his sister Jeanne was divorced. In a box nearby were Jeanne Hugo with her second husband, Dr. Charcot's son. Hugo and Charcot met in a corridor and, during a quarrel, Hugo struck. He sent a challenge, which M. Charcot refused to accept on the ground that he was his brother-in-law, and he then summoned Charcot before the criminal court for assault and battery. The trial will come off soon.

Lese majeste against Munich beer has brought down a sentence of banishment from the Hofbrauhaus upon an over-particular citizen of Munich. Having spoken with contempt of the Hofbrau he was told to leave and keep away till the beer season began. He then signed a written apology and was readmitted to the beer hall. After a while he began to grumble again, and was summoned to a police court and ordered to sign a formal document, retracting all his criticisms, or else to pledge himself not to enter the Hofbrauhaus again. He chose the latter alternative on conscientious grounds. The beer martyr's name is Späth.

## THESE ARE INTERESTING

The mines of the world produce every year five hundred and forty million tons of ore and coal.

One day recently the Merchants' Bank, Bridgewater, N. S., received the largest brick of gold ever taken from the mines in that or adjacent counties. It weighed five hundred and fifty-three ounces, and was valued at about ten thousand five hundred dollars. The beauty came from the mine at Brookfield.

At Warsaw a student has just been graduated at the ripe age of seventy-five. After passing his matriculation many years ago, lack of funds prevented him from at once proceeding to the university and he was compelled to work as a tutor for twenty years in order to save enough money to enable him to continue his studies. At the end of that time he presented himself at the Warsaw Medical academy and passed the entrance examination with distinction. Before he could begin his studies the Polish rebellion broke out and Borysik, who was now forty-one years of age, threw himself into the movement with all the enthusiasm of a youthful revolutionist. The revolt was suppressed and Borysik was exiled to Siberia, where for thirty-two years he underwent hard labor in the silver mines. In 1895 he received a free pardon and returned to Warsaw. In spite of his age and the hardships he had endured Borysik lost none of his enthusiasm for medical work and took up his studies where he had left off in 1863. After a two years' course this remarkable man has now, at the age of seventy-five, passed the final medical examination with honors and will begin to practice in Warsaw.

The most celebrated steeds of the civil war were Cincinnati, Traveler and Winchester, the favorite chargers of Grant, Lee and Sheridan. When the hero of Vicksburg visited Cincinnati a few months after the close of that brilliant campaign he was requested to visit a dying man, who was exceedingly desirous of seeing him. When they met he invalid said: "Gen. Grant, I wish to give you a noble horse, who has no superior on the continent, as a testimony of my admiration for your character and past services to our country. There is a condition attached to the gift—that you will always treat him kindly." Grant accepted the magnificent bay, of course, faithfully keeping his promise, and named him Cincinnati. He was a son of Lexington, with a single exception the fastest four-mile thoroughbred that ever ran on an American course. The general was offered \$10,000 for the horse, as he had a record of speed almost equal to that of his famous half-brother, Kentucky. Cincinnati was a superb and spirited steed of great endurance, Grant riding him almost constantly during the Wilderness campaign and passing from end to end of our long line. The noble horse was retired soon after the close of the war, enjoying "an old age of dignified leisure" on a Maryland estate, where his master frequently saw him and where he died and received honorable burial in September, 1874.

When the guests were seated for dinner, Mrs. George Morton, in the name of about thirty lady friends, presented the hostess with a handsome frosted silver bread plate, as a slight recognition of their appreciation of her faithful work in the church. The recipient claimed to be struck dumb, but as she asked the blessing upon the bountiful spread tables, she thanked the Lord for her friends in a very feeling manner. Many regrets were expressed when dispersing that so helpful a family must needs go from our midst.

## WARD MARS' BODY.

It May Be Brought Back to the United States.

Transportation Sent Capt. Graves To Go.

Mrs. Mars of Baroda, the mother of Private Ward Mars who died in Cuba of yellow fever, is very anxious that the remains of her son be brought home for burial.

Capt. Graves took the matter up with the war department and has received the following reply from G. D. Mielkejohn, acting secretary of war:

"I am in receipt of your letter of September 23. If you wish it the war department will give you permission to go to Cuba on any transport, provided you are accompanied by a professional undertaker and a hermetically sealed casket, and to return on any transport to the United States, for the purpose of bringing back to this country the remains of Private Ward Mars, referred to in your letter, and this is your authority to do so. Should you desire to go you can show this letter to any officers in command of military transports or stations, who are hereby directed to extend to you such facilities as they can to accomplish the object of your mission not inconsistent with the best interests of the United States. The quarantine authorities in New York City, so this department is informed, will permit the casket containing the remains of a yellow fever victim to enter New York City only in the event of that casket being hermetically sealed."

"Col. Kimball, the depot quartermaster, New York City, at the army building, will, if called upon, furnish you the necessary transportation upon presentation of this letter."

Capt. Graves is willing to go to Cuba again and run the yellow fever risk, if Mrs. Mars desires the effort to be made.

The lake shore fruit growers have loaded 90 cars with grapes from Summit station on the C. & W. M. railroad. The market for these grapes was principally in Iowa and it has proved of great benefit to the farmers as the price has averaged a half cent per basket higher than the Chicago market.

Mr. Oslater, who two years ago left very suddenly for Chicago, has returned and will buy a farm and reside here in the future. At the time Mr. Oslater left there was a rumor to the effect that he had found a large sum of money on his farm a couple of miles from the city, which had been buried by the Indians and it was with this that he purchased his Chicago property. He very emphatically denies the report.

### EATING APPLES.

The Poor Mother-in-law.

Mother-in-law stories are a drug on the market, but this one seems to be a little less druggy than usual.

A man and his wife went to Europe, and the man's mother-in-law went along. Up to this point there is no novelty in the story.

On the voyage the mother-in-law fell ill and died. Of course, she had to be buried at sea, and so the usual canvas sack was made, but instead of an iron weight to sink the body they used a bag of coal.

In commenting on the arrangements afterward the bereaved son-in-law, who stammered badly, said:

"I—I always knew where m-m-m-mother-in-law was g-going, but b-b-blame me if I s-s-supposed she'd have t-to carry her own f-f-fuel!"—Cleveland Plain Dealer.

Children as Grammarians.

Two little tots of 4 and 5 years respectively, living out of town, were anxiously awaiting the arrival of a favorite uncle from whom they were expecting a visit. The train came in, but no guest appeared, to the bitter disappointment of the little ones. They ran to their mother for consolation, the younger one saying:

"Mamma, don't you think Uncle Ned oughter come?"

"You mustn't say oughter; say shooder," put in the 5-year-old, with all the dignity that such a correction would imply.—New York Tribune.

## INDOOR CARNIVAL

TO BE GIVEN BY ST. JOSEPH CATHOLICS.

Governor Pingree Will Be Present One Evening and Give a Political Speech.

The St. Joseph Catholics will give an indoor carnival the 3, 4 and 5 of November. Father Gore and the young ladies' sodality have the matter in charge and are making great preparations for the event. Everything possible will be done to make the affair a success.

A letter was received this morning from Governor Pingree's private secretary stating that he would be in the city at the time and that they could count on him for a political speech one of the three evenings. The exact date has not yet been given.
